

COUGAR 8450 SEMI SYNTHETIC BOOM GREASE

Cougar 8450 Semi Synthetic Boom Grease is a highly adhesive, water resistant, extreme pressure grease especially designed to provide superior lubrication to wear pads on mobile crane telescopic booms, and lattice cranes.

Cougar 8450 which incorporates a unique semi synthetic base oil formulation incorporates advanced technology additives to lubricate and protect sliding surfaces, reducing friction and wear, extending wear pad life and re-lubrication intervals.

Cougar 8450 is a truly versatile lubricant: other applications include open gears, tower hoist rack and pinions, crane turntables and external wire ropes.

TYPICAL CHARACTERISTICS

Grade	8450
NLGI Grade	0 / 1
Colour	Dark Red
Texture	Highly Adhesive
Base Thickener	Lithium
Dropping Point °C	>170
Four Ball (ASTM D2596), Weld Load	315 KGS

FEATURES & BENEFITS

- Extreme Pressure- Reduces friction & wear, extends wear pad life.
- Water Resistant- Seals out moisture and prevents rust and corrosion.
- Highly Adhesive- extends re-lubrication intervals. Does not drip on windscreens and chassis when applied correctly.
- Reduces Labour - Easy to apply with either brush or roller. Safer to apply even at extreme heights.
- Reduces Juddering- Increases lubricity provides smoother surface contact between wear pads and boom section.
